

SIVASHANKARI AKASH

Configuration Management | Product Data | BOM & Catalogue Management

Chennai, India | +91 9444323271 | psshankari1999@gmail.com | [My Profile](#)

PROFESSIONAL SUMMARY

Results-driven Configuration Management professional with 3+ years of experience in automotive IT/software programs. Skilled in translating engineering specifications into system-level configuration data, managing BOMs, and ensuring data integrity across PDM/PLM systems. Proven track record in implementing engineering change management (ECO/ECM), maintaining audit-ready documentation, and driving cross-functional collaboration. Quick learner with strong process discipline, currently pursuing Six Sigma Green Belt certification with an active implementation project at ZF Group.

PROFESSIONAL EXPERIENCE

ZF Group – Software Engineer, Configuration Management Dec 2023 – Present

- Translated detailed product specifications and engineering data into accurate configuration items (CIs), supporting BOM integrity and catalogue data management across product lifecycle milestones.
- Supported implementation of engineering change orders (ECO/ECM) with high accuracy, ensuring data consistency and compliance with quality and change management processes.
- Created and executed action plans for configuration updates and product changes, collaborating with Engineering, Quality, and Manufacturing teams.
- Maintained complete and audit-ready documentation of all configuration activities using Windchill (PLM/RV&S;), IBM DOORS, and SharePoint.
- Ensured data consistency and integrity across PDM systems; monitored adherence to change management standards, escalating risks where required.
- Developed Python automation scripts to reduce turnaround time (TAT) and improve CM workflow efficiency and data reliability.
- Supported CI/CD pipelines ensuring configuration readiness, version traceability, and release compliance.
- Tracked configuration status and reported metrics to stakeholders, maintaining governance standards and CM process compliance.

ZF Group – Post Graduate Engineer Trainee, Configuration Management Dec 2022 – Dec 2023

- Managed configuration for automotive projects including Fuel Cell Compressor System and E-Driven Compressor (Single Stage Scroll).
- Identified critical work products, ensured baselining at milestones, defined document storage structures, naming conventions, and CM environments.

Ramco Systems – Analyst Programmer Jul 2022 – Dec 2022

- SQL backend developer for aviation domain applications, supporting HAECO GCSS systems with accurate data inputs and operational compliance.

CORE SKILLS

Configuration Management	BOM & Catalogue Data Management	Engineering Change Management (ECO/ECM)
PDM/PLM Tools: Windchill, IBM DOORS	Version Control & Baseline Governance	Audit Documentation & Compliance
ERP/PDM Data Integrity	Cross-functional Collaboration	Process Improvement & Automation
Python (Intermediate)	SQL (Intermediate)	SharePoint Power Automate
MATLAB & Simulink (Beginner)	SAP Awareness	Six Sigma Fundamentals

CERTIFICATIONS & TRAINING

- Six Sigma Green Belt** – Training completed (Apr 2025); currently executing an active implementation project at ZF Group for official certification.
- MATLAB Onramp & Simulink Onramp** – Completed (MathWorks, 2025); foundational proficiency in MATLAB scripting and Simulink model-based design (Beginner level).

EDUCATION

Master of Technology – Data Science and Business Systems | SRM Institute of Science and Technology, KTR | 2020 – 2022 | CGPA: 9.48 / 10 – First Class with Distinction

KEY STRENGTHS FOR THIS ROLE

- High attention to detail and data integrity in BOM, configuration data, and audit documentation — minimal rework.
- Strong learning agility: quickly adopted Windchill, IBM DOORS, Python automation, MATLAB/Simulink, and Six Sigma methodologies.
- Proactive cross-functional communication with Engineering, Quality, and Manufacturing stakeholders.
- Disciplined in documentation and audit readiness aligned with ECM, quality, and regulatory processes.
- Continuous improvement mindset: contributed to process simplification, automation scripts, and data quality enhancements.
