

Sivashankari Akash

Configuration Management | Product Data Management | Engineering Change & Release Management

psshankari1999@gmail.com | +91 9444323271 | Chennai, India | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Results-driven Configuration Management professional with 3+ years of experience in automotive IT/software programs. Skilled in BOM governance, engineering change management, baseline control, version control, audit readiness, PDM/PLM tooling, Python automation, and cross-functional collaboration. Actively pursuing Six Sigma Green Belt certification.

PROFESSIONAL EXPERIENCE

ZF Group – Software Engineer, Configuration Management

Dec 2023 – Present

- Managed Configuration Items (CIs), BOM integrity, and product data governance across automotive software programs.
- Defined and governed baselines, version control, and change tracking for end-to-end traceability across project milestones.
- Implemented Engineering Change Orders and controlled configuration updates ensuring compliance with CM, quality, and governance standards.
- Maintained audit-ready documentation in PTC Windchill (PLM/RV&S;), Codebeamer, IBM DOORS, and SharePoint.
- Developed **Python automation** solutions for metadata extraction, reducing workflow turnaround and improving data reliability.
- Collaborated with Engineering, Quality, Manufacturing, and PM teams to execute configuration action plans.
- Key Achievement:** Reduced release baseline report generation time from ~1 hour to ~20 minutes via workflow optimization.

ZF Group – Post Graduate Engineer Trainee

Dec 2022 – Dec 2023

- Served as CM lead for Fuel Cell Compressor System and E-Driven Compressor (Single Stage Scroll) automotive projects.
- Identified, classified, and governed configuration items ensuring traceability and lifecycle compliance.
- Managed baselines, document structures, naming conventions, access controls, and collaboration environments for project stakeholders.

Ramco Systems – Analyst Programmer

Jul 2022 – Dec 2022

- SQL backend developer supporting aviation maintenance and engineering applications within the HAECO GCSS ecosystem.
- Developed and maintained T-SQL queries, stored procedures, and database objects to support operational requirements.

KEY PROJECTS & ACHIEVEMENTS

- Python Automation – Configuration Management:** Automated metadata extraction from SharePoint and PTC RV&S;, reducing manual effort and improving data reliability.
- Excel Dashboard Automation (Power Query):** Recreated a Power BI-style dashboard in Excel using Power Query for automated KPI reporting and stakeholder visualization.
- SharePoint & Power Automate Reporting:** Built automated workflows to retrieve metadata and generate status reports, improving governance visibility.
- Biometric ATM System (UG Research):** Fingerprint & facial recognition ATM authentication using Raspberry Pi, OpenCV, and Haar Cascade; published survey & journal paper.
- Drug Sentiment Analysis – Deep Learning (M.Tech):** Hybrid Bi-GRU + CNN + Spark NLP model for drug review sentiment analysis achieving 93.13% validation accuracy.

CORE SKILLS & TOOLS

PLM/PDM Tools	PTC Windchill, PTC RV&S;, Codebeamer, IBM DOORS, SAP
Configuration Mgmt	BOM Governance, Baseline Control, ECO/ECM, Version Control, Audit Compliance
Automation & Data	Python, SQL, Power Query, Power Automate, Excel Dashboarding, SharePoint
Engineering Tools	MATLAB, Simulink, Git, CI/CD Support
Soft Skills	Cross-functional Collaboration, Process Improvement, Reporting & Analytics

EDUCATION & CERTIFICATIONS

M.Tech – Data Science & Business Systems

CGPA: 9.48 / 10

SRM Institute of Science and Technology

- Certifications:** Six Sigma Green Belt (training complete, project in progress) | Six Sigma Yellow Belt (in progress) | MATLAB Onramp | Simulink Onramp
- Publications:** Biometric ATM System (Survey + Journal, IJRASET) | Drug Sentiment Analysis – Bi-GRU + CNN (M.Tech Journal, available on request)
